The vigenere cipher is a method of encrypting alphabetic text by using a series of interwoven Caesar ciphers based on the letters of a keyword.

I'm not sure what this means, but it was left lying around: blorpy

gwox{RgqssihYspOntqpxs}

From the challenge name it's clear that it's a vigenere cipher.

Vigenere cipher uses a key to decode.

Cipher text provided here is: gwox{RgqssihYspOntqpxs}

Key is: blorpy

I used this [site](#) to decode vigenere cipher.
